

# Safety, Health, Environmental and Quality Management Commitment Statement

Longwood Engineering Management recognises that they have a responsibility to conduct business in a way that protects and improves:

- Health and safety practices (OHSAS 18001:2007)
- Quality (ISO 9001:2007)
- Environmental issues (ISO 14001:2004)

We have developed and plan to integrate our management system in line with the 2015 revisions of these standards, for accreditation during 2018. This accreditation will work alongside our Sustainable Supply Chain Charter.

As management of the Company our core values are:

- Actively promote a sustainable and safe workforce. The health, safety and wellbeing of our employees is our number one priority. We will support our employees to achieve their full potential in a safe workplace to make sure our employees (and anyone else that may be affected by our activities) are engaged and focused. They have the right to leave work each day in the same condition of health as they arrived that morning.
- Set an example by demonstrating good health, safety, quality and environmental practices. Provide and undertaking training to support this standard.
- Comply with Company health, safety, quality and environmental policies and procedures.
- Maintain a competent and pro-active workforce, a suitably approved supply chain, listen to feedback and act upon it when necessary.
- Encourage our work force to be proactive through training/information and best practices.
- Support and enforce the company sustainable business charter. The purpose is to deliver social, economic and environmental benefits from our supply chain whilst continuing to deliver real, long term values.

We are committed to working together to:

- Demonstrate compliance with health, safety and environmental laws and regulations.
- To maintain and improve the systems through meetings, training and best practices.
- Set high standards of health, safety, quality and environmental practice, and to lead by example
- Demonstrate health, safety, quality and environmental standards to gain customers recognition of this by sharing best practice to improve our performance.
- Facilitate the securing of contracts with customers.

This commitment statement is approved and signed by the management team in order to demonstrate our joint commitment to the continued development and integration of Health, safety, quality and environment management systems within the company. Also to set out the key leadership values and behaviours to provide a productive, safe and healthy workplace.
